

Please do not let the National Broadcasting Association to impair my access to local weather reporting by limiting Satellite Radios transmissions to only national forecasts.

I am strongly in favor of allowing regional broadcasts by Satellite Radio (Sirrius and XM Radio) with more local information in both news and weather.

This is not an impingement on the local broadcasters rights, but rather on our ability to choose and pay for what we wish to hear.

Please reject NAB's Petition 04-160

Thank you for helping,
